

Dear parents,

I hope you had a nice autumn break with your children and you could enjoy the last warm days together.

Unfortunately, the risk to get infected by the coronavirus got much higher in Bremen over the past weeks.

Because of that, we have to be much more careful and as a result, it is necessary to introduce some more rules at our school besides the ones already stated.

- After 20 minutes all windows must be opened for ventilation. In the middle and at the end of every lesson.
- If the students wear a mask in the lessons, he or she is allowed to get some fresh air every 45 minutes.
- The cohort sizes are limited to 60 students. Therefore the class of your child is paired with only one more class. There won't be any lessons with students from other classes besides that. Contacts to other cohorts are forbidden in every area of the school (canteen, school yard etc.).
- In breaks where it is raining the canteen will be opened for the students and the students are allowed to stay in their classrooms.
- Not all WAG- and QF-courses can take place because the Bremen Senat has forbidden non-teachers to work in school. The ones held are voluntary. But if your child decides to go there, he or she has to come on a regular basis.
- The changing rooms of the sports hall are closed. The students have to come already changed to school and only put on shoes right before sports class. It would be good if your child brings a second t-shirt. During sports lesson, the students have to keep distance of 2 metres.
- In music lessons, singing as well as the usage of wind instruments are forbidden.

Please discuss these new rules and the old ones, stated in the hygiene concept, with your child as well as the importance of following them.

The hygiene concept and the description for the procedure if a child is infected with corona will be translated to English shortly.

Please have in mind to inform the school immediately if your child is tested positive.

Kind regards,

Matthias Schmuhl
headmaster
